Patronising Blackmailing Jour-

A decent and honest business. If it be of im half to this claimant and half to that but now that portance to require publication through the newsthree-fifths must go to this one and two-fifths to that papers, ought to choose the columns of such one. The Marshal went up to Walluku on Monday journals as have the credit of honesty and integrity as their policy. It may be doubted if the Mr. publication of any worthy business through any other medium is not positively injurious. There are department in the Exhibition. The original sewing department in the Exhibition. seen by decent people, and their appearance in Naval .- The U. S. surreying ship Portsmouth re- any newspaper, excepting blackmailing prints, is Naval.—The U. S. surreying ship Portsmouth returned from a two months cruise on the 6th, having been as far east as the locality assigned to Copper and Cooper Islands, about longitude 130°. She visited fierce wrestling for public patronage, have often disregarded this view, and have given their advertising to very disreputable publications. The same thing might be said of other organizations, wethods of instruction and the number of scholars. is therefore very evident that no island or shoal exists between this group and west longitude 136°, and between the degrees of latitude 20° and 40° north. Nor is there probably any island or shoal between the degrees of latitude named, east of longitude 136°, except the islands which skirt the mainland, at a distance of from 50 to 200 miles from it.

The Courts.

Same thing might be said of other organizations, companies and individuals. If one advertises in disreputable, although this may not always be true, since sometimes such advertisements are given out thought-leasly, and in other cases they are published without nuthority, upon the principle of chance, the proprietors taking their risk as to compensation.

The Courts. Every respectable business had better not be published at all than to find way to the public Angust 4, 1873—Before the full Bench.

Willfong et al., Appellees, va. Balley, Appellant.—

Mr. Stanley having moved that the Court do order concisely where the division be made, and counsel makes the following pertinent remarks in a late

American exhibitor, but it was sminingly accinete. He spent some time in studying the map of the spent some time in studying the spent some time in studying the map of the spent some time in studying the map of the spent some time in studying the map of the spent some time in studying the map of the spent some time in studying the map of the spent some time in studying the map of the spent some time in studying the spent some time in studying the spent some time in stu on both sides having stated their views, the Court made a supplementary decree: that the Marshal, in executing the judgment of the Court in this case, shall divide the Kamaanwal water at the point where it is now taken off from the lateral ditch to the appellant's mill, and so average the water that they are deliberately seeding a system which will devour them in the closely at the exhibition of gold pens, testing their constitution of the country were represented. He looked closely at the exhibition of gold pens, testing their country were represented. When a seed the value and denomination of the notes. two fifths shall flow into the appellant's land for living the first land for living the shall flow into the appellant's land for living the shall flow into the appellant's land for living the first land for living the shall flow into the appellant's land for living the shall flow into the appellant flow into the shall f premises to the persons below entitled thereto, and that the appellant shall at all times permit the free access to his premises to all persons elsiming fitle in said three-fifths of water, for the purpose of ascertaining the use made by appellant of said water; said appellant being forbidden and enjoined from using for irrigation any portion of the said three-fifths.

Probate Cenrt.

August 4, 1875—Before Justice Hartwell, at Chambers.

Guardianship of Keoni Anna and John Anna, Minors—Petition of minors that the Guardian be ordered to reader an account of his guardianship. Case parily heard, but continued to August 11th, for production of Guardian's account books to prove the value of cattle sold.

Tennesce Pennsylvania, Illinois and Indiana was accrutinized. The blocks of coaland iron were interable and youndered as to quality and production. While he was passing through the musical department the Austrian Hyunn was played by a pair or organ, and the Emperor raised his hat. The display of boots, shoes, and leather, whica is large, he examined critically.

Along time the Emperor, who inquired as to quality and production. While he was played by a pair or organ, and the Emperor raised his hat. The display of boots, shoes, and leather, whica is large, he examined curiously the musical department the Austrian Hyunn was played by a pair or organ, and the Emperor came to the time the substance of dollars more. In the meantime, by tolerating piracy, they are giving poor encouragement to honest journalism." It is very possible that we have, in this city and State, no such journals as those alluded to by the Spectator, and in this article no allusion is made intentionally to any print to us known. But there may be such, as in years past there have been, and of such we speak. If the public would have a respectable and honest press, it should not patronize dishonest press, it should not patronize di to complain of a hireling or blackmailing press .-Alla.

Shipping Dirt in Wool.

There is another practice in connection with our dustry to which we wish to call the attention of growers. We refer to that of shipping wool to the
Eastern market in the dirt, as it comes from the
sheep. An industry that can be made to pay as good

He said he would reserve another day for the ex-Eastern market in the dirt, as it comes from the sheep. An industry that can be made to pay as good a profit as this industry does, after being subjected unnecessarily to so great an expense as paying freight Emperor shook hands with Messrs. Jay and Garreton so large a quantity of dirt so great a distance, is son, expressing thanks for the courtesy shown him. certainly worthy of better and more reasonable man agement, and we appeal to the business sense of our agement, and we appeal to the business sense of our capabilities and resources of the United States. The

nounds. There was used by the mills of the State York and Boston in the dirt. The spring elip of 1873, costs, \$3.40-appealed to Circuit Court. Aug. 9th | as shown by receipts at San Francisco, bought by lo-Samquoy (Chinaman,) selling opium without II. eal mills and shipped direct from the interior, is 15,-

The increase of lambs this year has been greater than ever before, consequently the fall clip promises labor, and to pay costs, \$3.50 - appealed to Circuit to be proportionately greater than heretofore, and it Is safe to put the clip for this year down at 28,000,000 pounds. Allowing 2,000,000 for home consumption by our mills, there will be 25,000,000 nounds to be shipped East. The freight on this wool and dirt at \$50 a ton is \$625,000. New, our wool strings by scouring, on an average, sixty per cent. In other words, there is sixty per cent. of dirt in it. Let us see, then, what we would gain by scouring it before shipping :

Sixty per cent. off of 25,000,000 pounds would leave but 10,000,000 pounds of seoured wool. The freight NEW GOODS, NEW GOODS! on this amount would be but \$250,000. This deduct ed from \$625,000 shows a gain in freight of \$375,000. Another consideration : the wool in the dirt is worth Before A. Fornander, Circuit Judge, at Chambers. here 20 cents a pound, but when scoured it is worth 75 cents. The clean wool, 10,000,000 pounds at 75 cents, is worth \$7,500,000; 25,000,000 pounds, at 20 cents is worth 5,000,000. This shows a gain in price of \$2,500,000. To which add \$375,000, the gain in freight, and we have a gain of \$2,875,000. But i will cost us two cests a pound, or \$500,000, to scour it, which must be deducted from the above gain, This will leave us \$2,575,000 as the total gain that our wool-growers would have made on the present year's erop, had they been prepared and had adopted the plan of scouring their wool before shipping. In this calculation we have not taken into account the counts approved, heirs decreed, and Administrator loss of the interest on the money represented by the wool during the time necessarily consumed in scour June 6-Estate of J. B. Black, deceased-Petition ing, nor the gain that would have resulted from the for approval of accounts, &c.; accounts approved, less number of pounds to be handled; but these are comparatively but small elements in the calculation, Estate of D. F. Grant, decreased-Petition for ap- and we have allowed one to balance the other. To er, we have only to state that the men who shears Estate of S. F. Cleveland, deceased - Petition for this year 25,000 pounds will save on his crop, by hav-N. Hong, in Record.

The Vienna Exposition.

Virit of the Emperor of Austria to the American Department—He is offered a glass of American Chempogue, but "smilingly declines."

VIENNA, July 22d.—The Emperor visited the American department this morning. Notice had been given beforehand. His Majesty wore a Field Marshal's uniform. He was received at the entrance by Mr. Garretson, Chief Commissioner, Minister Jay, Mr. McElrath, Mr. Peck, and other Commissioners. The Foncarry accommanied by Messra, Garretson and machine, made by Elias Howe, was examined will deep attention, the Emperor asking what additions improvements had been made. He went through elaborate examinations of other sewing machines souri, New York, and California wine exhibition asking about the qualities of the wines. A gl-American champagne was offered the Emperor American exhibitor, but it was smilingly dec

how cars of such unusual length could turn on ordi-nary railway curves.

Finally he said to Mr. Garretson, "For improve-ments and new inventions since the last Exposition, America is without comparison in the entire build-ing." In all, the Emperor spent two hours in close sentiny of our department. Perfect order prevailed; although there were no poince and a large number of
